

ROTATIONAL RELEASE SUB

PRODUCT 15-568

The **TechWest Rotational Release Sub** allows positive release of the tubing. The rotational release sub is used between packers in single, dual, and triple completions. It may also be used in conjunction with a shear release sub if desired.

FEATURES

- Right or left hand release available
- Standard tubing sizes
- Single-, dual-, and stacked-packer completions
- Fracturing, acidizing, and remedial workover service
