

PUMP OUT PLUG

PRODUCT 20-053

The **TechWest Pump Out Plug** may be used as a temporary plug to facilitate setting of hydraulic packers. The plug may be manufactured solid or with a hole and ball seat. A ball is dropped into a seat in the Pump Out Plug, and pressure applied on the tubing to set the packers and shear out the seat.

This Pump Out Plug is available in all common tubing sizes and threads, with either a Half Mule Re-Entry Guide down or with a pin down.
