

ADJUSTABLE SUB WITH ROTATION LOCK

PRODUCT 15-539

The **TechWest Adjustable Sub with Rotational Lock** is installed below a multi-string packer, allowing easier connection or space-out of the tubing between multiple-string packers and tailpipe. The rotational lock allows the sub to be locked in place at any desired length, up to 24 in., and prevents telescoping or rotational movement.

SPECIFICATIONS

15-539 SPECIFICATION GUIDE				
Tubing	Max OD	Min ID	Product Number	Standard Connection
	in / mm	in / mm		
2 7/8 73.0	3.688 93.7	2.484 63.1	15-539-0250	2 7/8 EU 8 RD
3 1/2 88.9	4.500 114.3	2.992 76.0		

FEATURES

- Adjustable up to 24"
- Locks tubing from Rotation
- Premium connections and materials available
- Tensile strength exceeds that of tubing size
- Used to easily space out dual-string tubing completions from surface
