

F TYPE AND R TYPE LANDING NIPPLES

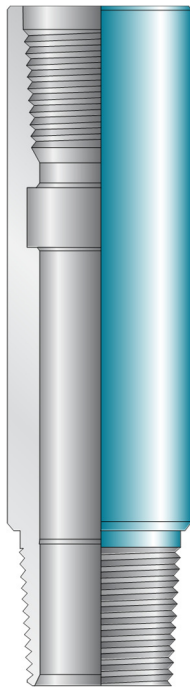

PRODUCT 20-359

The **TechWest F Type Nipple** is a selective or top no-go Landing Nipple that allows for the location and installation of many flow control devices such as Blanking Plugs, Bottom Hole Chokes etc.

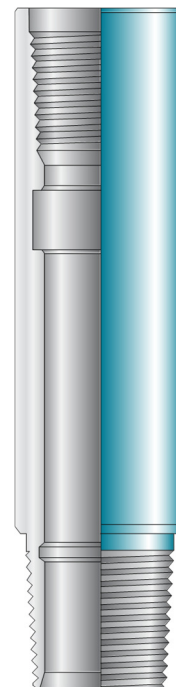

This nipple has a locking groove which allows for the internal locking of the flow control devices. The seal area provides a polished seal surface to pack off any flow control device. One or more F Type Nipples can be run in the string,

The **TechWest R Type Nipple** is a bottom No-Go version of the F Type Nipple. The bottom No-Go shoulder provides means to positively locate the appropriate flow control device into the R Type Nipple.

Both Product are available with standard or premium threads and common or custom materials.
