

HALTER STUFFING BOX

PRODUCT 804

The **TechWest Halter Stuffing Box** is an economic, reliable assembly that seals against the reciprocating polished rod, providing isolation between the wellbore and atmosphere.

The TechWest stuffing box is designed specifically to provide operators with reliable seal integrity combined with simple and easy installation and redressing.

A **Thermal** high-temp version of the Halter Stuffing Box is available (Product 802).

FEATURES

- Threaded Cap (no bolts to tighten)
- Dual and Single packing versions available
- Grease ring ensures lubrication of packing
- Wiper ring isolates debris from packing
