

CEMENTING SEAL JOINT (CSJ)

UNIT 121

The **TechWest Cementing Seal Joint (CSJ)** is made up with the liner setting tool using a CSJ polished nipple to extend down through its ID. A profile to receive and hold the bushing in place is machined into the ID of the setting collar, or the packer.

After cementing, the CSJ and bushing is retrieved with the setting tool.

FEATURES

- Available for drillable for retrievable pack-off bushings
- 12FT, 15FT, or 20FT Seal Joints can be provided
- Field adjustable shear ring for launching liner wiper plugs
